Question 1 | Correct Mark 1.00 out of 1.00**Problem Statement**

Given an array of 1s and 0s this has all 1s first followed by all 0s. Aim is to find the number of 0s. Write a program using Divide and Conquer to Count the number of zeroes in the given array.

Input Format

First Line Contains Integer m – Size of array

Next m lines Contains m numbers – Elements of an array

Output Format

First Line Contains Integer – Number of zeroes present in the given array.

Answer: (penalty regime: 0 %)

```

1 #include <stdio.h>
2
3 int countZeros(int arr[], int low, int high, int size) {
4     if (high >= low) {
5         int mid = low + (high - low) / 2;
6
7         if ((mid == 0 || arr[mid - 1] == 1) && arr[mid] == 0) {
8             return size - mid;
9         }
10        else if (arr[mid] == 1) {
11            return countZeros(arr, mid + 1, high, size);
12        }
13        else {
14            return countZeros(arr, low, mid - 1, size);
15        }
16    }
17    return 0;
18}
19
20
21 int main() {
22     int m;
23     scanf("%d", &m);
24
25     int arr[m];
26     for (int i = 0; i < m; i++) {
27         scanf("%d", &arr[i]);
28     }
29
30     int result = countZeros(arr, 0, m - 1, m);
31     printf("%d\n", result);
32
33     return 0;
34}
35

```

KAVI MUGILAN R 2024-CSE ▾**K2****Started on** Wednesday, 15 October 2025, 10:26 AM**State** Finished**Completed on** Wednesday, 29 October 2025, 10:50 AM**Time taken** 14 days**Marks** 1.00/1.00**Grade** **10.00** out of 10.00 (100%)

Question 1 | Correct Mark 1.00 out of 1.00

Given an array `nums` of size `n`, return *the majority element*.

The majority element is the element that appears more than $\lfloor n / 2 \rfloor$ times. You may assume that the majority element always exists in the array.

Example 1:

Input: `nums = [3,2,3]`
Output: 3

Example 2:

Input: `nums = [2,2,1,1,1,2,2]`
Output: 2

Constraints:

- `n == nums.length`
- `1 <= n <= 5 * 104`
- `-231 <= nums[i] <= 231 - 1`

For example:

Input	Result
3	3
3 2 3	
7	2
2 2 1 1 1 2 2	

Answer: (penalty regime: 0 %)

```

1 #include <stdio.h>
2
3 int majorityElement(int arr[], int n) {
4     int count = 0;
5     int candidate = 0;
6
7     for (int i = 0; i < n; i++) {
8         if (count == 0) {
9             candidate = arr[i];
10            count = 1;
11        } else if (arr[i] == candidate) {
12            count++;
13        } else {
14            count--;
15        }
16    }
17
18    return candidate;
19}
20
21 int main() {
22     int n;
23     scanf("%d", &n);
24
25     int arr[n];
26     for (int i = 0; i < n; i++) {
27         scanf("%d", &arr[i]);
28     }
29
30     int result = majorityElement(arr, n);
31     printf("%d\n", result);
32
33     return 0;
34 }
```

Question 1 | Correct Mark 1.00 out of 1.00**Problem Statement:**

Given a sorted array and a value x, the floor of x is the largest element in array smaller than or equal to x. Write divide and conquer algorithm to find floor of x.

Input Format

First Line Contains Integer n – Size of array
Next n lines Contains n numbers – Elements of an array
Last Line Contains Integer x – Value for x

Output Format

First Line Contains Integer – Floor value for x

Answer: (penalty regime: 0 %)

```
1 #include <stdio.h>
2
3
4 int findFloor(int arr[], int low, int high, int x) {
5     int floorIndex = -1;
6
7     while (low <= high) {
8         int mid = low + (high - low) / 2;
9
10        if (arr[mid] == x) {
11            return arr[mid];
12        }
13        else if (arr[mid] < x) {
14            floorIndex = mid;
15            low = mid + 1;
16        }
17        else {
18
19            high = mid - 1;
20        }
21    }
22
23
24    if (floorIndex == -1)
25        return -1;
26
27    return arr[floorIndex];
28}
29
30 int main() {
31     int n;
32     scanf("%d", &n);
33
34     int arr[n];
35     for (int i = 0; i < n; i++) {
36         scanf("%d", &arr[i]);
37     }
38
39     int x;
40     scanf("%d", &x);
41
42     int floorValue = findFloor(arr, 0, n - 1, x);
43     printf("%d\n", floorValue);
44
45     return 0;
46 }
47 }
```

Question 1 | Correct Mark 1.00 out of 1.00**Problem Statement:**

Given a sorted array of integers say arr[] and a number x. Write a recursive program using divide and conquer strategy to check if there exist two elements in the array whose sum = x. If there exist such two elements then return the numbers, otherwise print as "No".

Note: Write a Divide and Conquer Solution

Input Format

First Line Contains Integer n – Size of array

Next n lines Contains n numbers – Elements of an array

Last Line Contains Integer x – Sum Value

Output Format

First Line Contains Integer – Element1

Second Line Contains Integer – Element2 (Element 1 and Elements 2 together sums to value "x")

Answer: (penalty regime: 0 %)

```

1 #include <stdio.h>
2
3 int findPair(int arr[], int left, int right, int x, int *num1, int *num2) {
4     if (left >= right) {
5         return 0;
6     }
7
8     int sum = arr[left] + arr[right];
9
10    if (sum == x) {
11        *num1 = arr[left];
12        *num2 = arr[right];
13        return 1;
14    }
15    else if (sum < x) {
16
17        return findPair(arr, left + 1, right, x, num1, num2);
18    }
19    else {
20
21        return findPair(arr, left, right - 1, x, num1, num2);
22    }
23 }
24
25 int main() {
26     int n;
27     scanf("%d", &n);
28
29     int arr[n];
30     for (int i = 0; i < n; i++) {
31         scanf("%d", &arr[i]);
32     }
33
34     int x;
35     scanf("%d", &x);
36
37     int num1, num2;
38     if (findPair(arr, 0, n - 1, x, &num1, &num2)) {
39         printf("%d\n%d\n", num1, num2);
40     }
41     else {
42         printf("No\n");
43     }
44
45     return 0;
46 }
47

```

Question 1 | Correct Mark 1.00 out of 1.00

Write a Program to Implement the Quick Sort Algorithm

Input Format:

The first line contains the no of elements in the list-n

The next n lines contain the elements.

Output:

Sorted list of elements

For example:

Input	Result
5	12 34 67 78 98
67 34 12 98 78	

Answer:

```

1
2
3
4 #include <stdio.h>
5
6
7 void swap(int *a, int *b) {
8     int temp = *a;
9     *a = *b;
10    *b = temp;
11 }
12
13
